

Bend single seat (steel)

Article number: 20002028

Series: Bend

Product description

The Bend single seat is a **beautiful and robust** version of the bench within the Bend series. With its contemporary design, this Bend line fits well into today's streetscape. This version of the Bend bench, unlike the other Bend benches, does not have a wooden seat. The bench is **made entirely of steel** and can therefore withstand rough handling. An additional advantage is the fact that the bench dries quickly after a rainstorm. The visitor to the outdoor area can therefore quickly enjoy the comfort of the bench again.

Materials

The base of the bench is made of steel. The steel is hot-dip galvanized and two-layer powder coated. This treatment ensures that the bench is protected against various weather influences and can take a beating. The bench can be coated in all possible RAL or AKZO colors. The bench can thus be adapted in color to the environment.

Extra information

Length:

1800 mm

Width:

430 mm

Height (from ground level):

460 mm

Length backrest

1358 mm

Material seat surface
