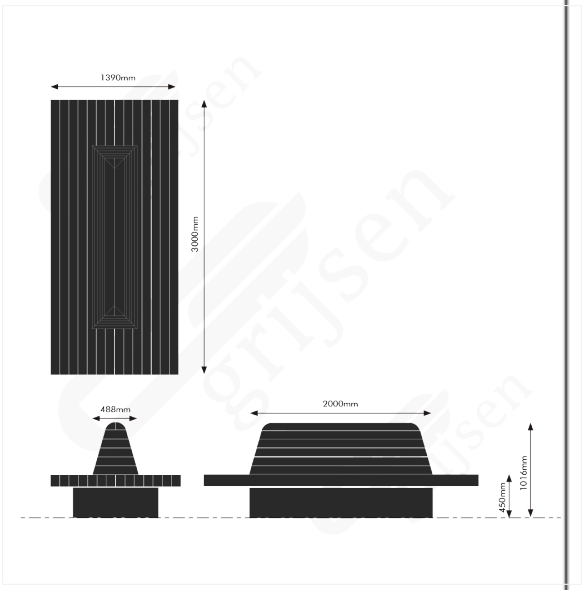
PRODUCT SPECIFICATION SHEET

Tail (small backrest)

Article number: 20001054

Series: Tail



Product description

The Tail with a small backrest offers the comfort of a backrest but does not make the bench more imposing than it already is. The backrest is low and ensures that the Tail bench is nicely proportioned. A comfortable, beautiful, and architectural bench. Because of the size of this Tail bench, the meeting point and resting point go well together: in both residential, work, and tourist environments. With the backrest of the Tail, all kinds of variations are possible, such as integrating a planter. The Tail small backrest can be executed with a concrete base. This makes it look even more robust and less waste remains under the bench.

Features

- Suitable for busy places
- Integration of a planter possible
- Length is variable

Materials

The bench is produced from steel and wood. The steel is hot-dip galvanized and two-layer powder coated in a RAL color of choice. This ensures that the bench, like our other products, will last a long time in public spaces. The seat is made of untreated hardwood. This wood is 100% sourced from FSC-certified forests. This means that the wood has been harvested sustainably and responsibly.
