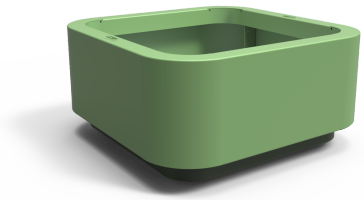
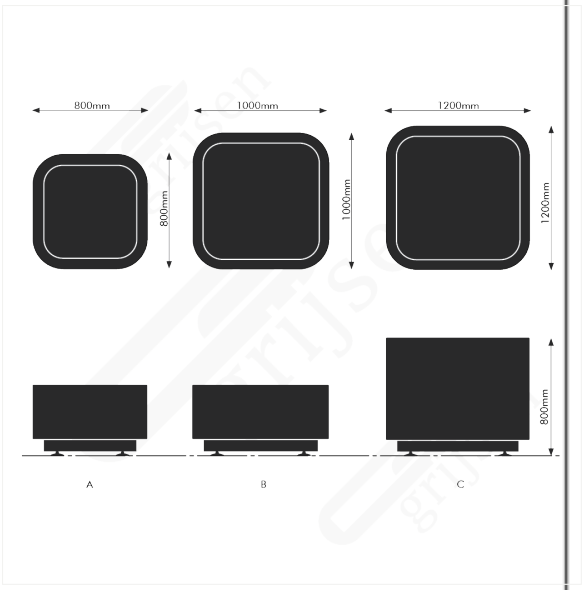
Solid

Article number: 80000152

Series: Solid





Product description

The **planter Solid**, of course, gets its name from its design. This **stylish** planter is related to the Plane Solid bench family and, thanks to its **rounded corners**, is suitable for both **modern** and **classic locations**. The planter is equipped with adjustable feet so that it can be placed straight even on uneven surfaces. As standard, the planter Solid is available in three sizes.

Planters are a great solution to the problems of heat stress and water excess. In the places where these problems are greatest, it is difficult to place greenery, because of all the cables, pipes, and soil with archaeological value. The planters make it possible to create greenery for natural shade and to absorb peaks in rainfall.
