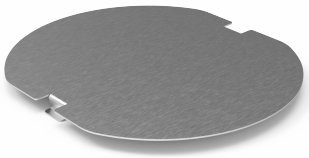
Cover for litter bin

Article number:

Series: Accessories



Product description

The cover plate makes it possible to (temporarily) close litter bins. The cover plate is easy to apply in the waste bin. This closes off the insertion opening of the waste bin. This makes it impossible to throw e.g. fireworks into the bin. Because the cover plate is fixed to the inside of the bin, it is also impossible for a vandal to remove the fireworks cover plate.

Extra information

Size	Depending on bin model
Material	Stainless steel
Available for	Constructo Column Quadrat
Do you have our Constructo 102 or Constructo 202 litter bins?	Good news! With these litter bins, the cover plate is included as a bottom plate. The bottom plate can be removed from underneath the bin and applied as a cover plate. A separate cover plate is not required.
