

# Constructo 202

Article number: 10001252

Series: Constructo II

## Product description

The **Constructo 202** is the largest waste bin within the Constructo II series. This makes this bin extremely suitable for busy locations where a relatively large amount of waste is generated. Besides a **large capacity**, this bin is **high quality** and user-friendly. The Constructo 202 has **no visible fasteners** and the insertion of the litter bin is slanted inwards. This prevents waste from lying around on the opening. The Constructo 202 is **fully modular** and therefore has a nice **circular base**. Optionally, the 202 can be supplied with an integrated ashtray in the hood. This waste bin is equipped with a plastic bag holder.
