PMD Insert waste reducer

Article number:

Series:

Product description

The PMD Insert waste reducer is a solution for public waste bins. This smart construction effectively reduces the opening, specifically designed for PMD waste (Plastic packaging, Metal packaging, and Drink cartons). It prevents the dumping of household waste in public bins while encouraging proper disposal of PMD items. The insert fits between the lid and the opening of the bin, featuring a round aperture suitable for bottles. Made from galvanized and powder-coated steel in a RAL color of your choice, this insert helps guide users to dispose of only PMD waste. By focusing on proper waste separation, it contributes to a cleaner public space, more efficient waste management, and improved recycling rates.

Extra information

Size

Depending on bin model

Materiaal

Steel, hot-dip galvanized and double powder-coated 120 µm, in RAL colour of your choice

Available for:

- Constructo 50
- Constructo 65
- Constructo 72
