PRODUCT SPECIFICATION SHEET

Vertical insert waste reducer

Article number:

Series:

Product description

This vertical insert waste reducer is a solution for litter bins in public spaces. This clever construction effectively reduces the opening, preventing dumping of household waste in public bins. The stainless steel plate is placed on top of the aperture and features two crescent-shaped cut-outs. The plate is made of galvanised and powder-coated steel in a RAL colour of your choice. By adding the vertical insert waste reducer, users are encouraged to throw away only small litter, contributing to a cleaner public space and more efficient waste management.

Extra information

Dimensions

Depending on the bin mode

Materiaal

Steel, hot-dip galvanized and double powder-coated 120 µm, in RAL colour of your choice

Available for:

- Constructo 50
- Constructo 65
- Constructo 72
