

Constructo 202 (2 streams for waste separation)

Article number: 10001248

Series: Constructo

Product description

The **Constructo 202 waste bin (two fractions)** has throw-in openings for one fraction each on both sides. The Constructo 202 with two fractions has a capacity of 2x 90 liters. The Constructo 202 is **fully modular** and therefore has a nice **circular base**. This bin is equipped with two plastic bag holders. This bin also has the advantages of the Constructo II series. The waste bins are optionally supplied with a sticker set for on the door panel of the waste bin. On the panel, there is a recess where the sticker can be stuck on. The sticker indicates which waste stream belongs in the fraction. The Constructo 202 waste bin is [also available with a single fraction](#) that allows for the unsorted collection of waste.
