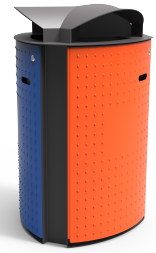
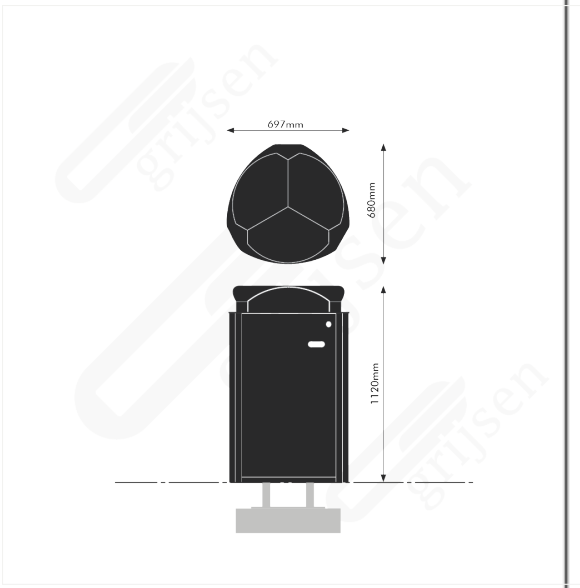
# Constructo 210

Article number: 10001010

Series: Constructo





## Product description

The **Constructo 210** is a waste bin for a **separate collection of waste** with three different fractions. These **three fractions** can be for example PMD, paper, and residual waste. Each faction has a capacity of 70 liters. The round design makes the bin suitable to be placed in the middle of a square or other open location. It is possible to give the panel of each faction a different color, to clearly communicate that it is a bin with different fractions. The Constructo 210 is **fully modular.** This immediately gives the Constructo 210 a **circular basis.**

## Extra information

**Material frame:**

Steel, 4 mm, hot-dip galvanized and two-layer powder coated 120 µm, in RAL colour of your choice

**Materiaal panels**

Steel, 2,5 mm, studded plate, hot-dip galvanized and two-layer powder coated 120 µm, in RAL colour of your choice, with piano hinge
