

Constructo 210

Article number: 10001010

Series: Constructo

Product description

The **Constructo 210** is a waste bin for a **separate collection of waste** with three different fractions. These **three fractions** can be for example PMD, paper, and residual waste. Each fraction has a capacity of 70 liters. The round design makes the bin suitable to be placed in the middle of a square or other open location. It is possible to give the panel of each fraction a different color, to clearly communicate that it is a bin with different fractions. The Constructo 210 is **fully modular**. This immediately gives the Constructo 210 a **circular basis**.

Extra information

Material frame:

Steel, 4 mm, hot-dip galvanized and two-layer powder coated 120 µm, [in RAL colour of your choice](#)

Materiaal panels

Steel, 2,5 mm, studded plate, hot-dip galvanized and two-layer powder coated 120 µm, [in RAL colour of your choice](#), with piano hinge

Material inner box

[Stainless steel inner boxes](#)

Optional

The bin can be supplied with:

- Fireworks cover (removable)

- Stickers for waste separation (See the download for file specifications)

Capacity

210 liter (3x 70L)

Including concrete base?

The bin comes with concrete base

Weight excl. concrete base

150 kilogram
